## Obtaining Computer Mac Address for InterCAX Software Licenses

### Windows

1. Launch a command window. On Windows 7, you can do this by clicking on the **Start** button, searching for **cmd**, and clicking on **cmd.exe** from the search results.
2. Type **ipconfig /all** in the command line and press *Enter*. Note down the physical address (mac address) for any of your Wired or Wireless LAN adapters, as shown below. Note: Do not use the address of a virtual network adapter. The description field indicates if the adapter is for a physical network card, as in the case below, or if it is a virtual adapter.

```
Wireless LAN adapter Wireless Network Connection:
Connection-specific DNS Suffix . . . : 
Description . . . . . : Intel(R) Centrino(R) Ultimate-N 6300 AGN
Physical Address. . . . . : 00-24-D7-EC-24-DC

```

3. Email the mac address and your full contact information (including company affiliation) to [info@intercax.com](mailto:info@intercax.com) to receive your license file.

# Mac OS X

## *Obtaining Mac address via System Preferences*

1. Launch **System Preferences** and select **Network** under **Internet & Wireless**.

2. Click on **Advanced**.

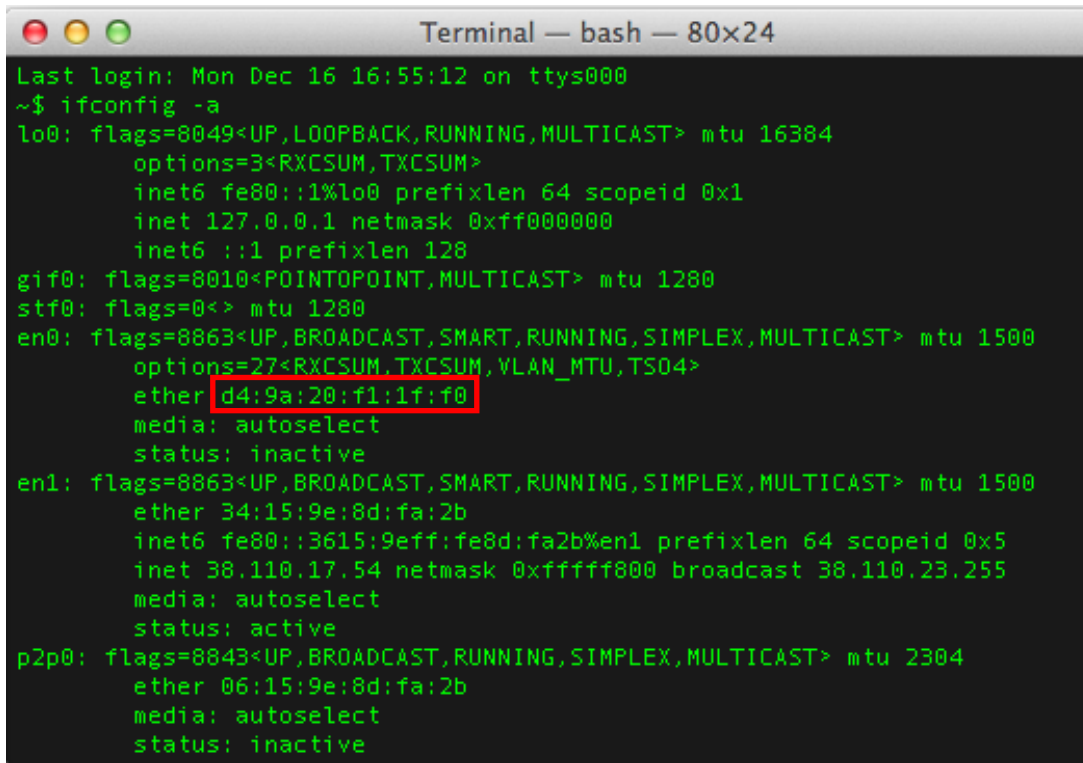

3. Select the **Hardware** tab and note down the **MAC Address**  
d4:9a:20:f1:1f:f0 is the MAC address in the figure below

4. Email the mac address and your full contact information (including company affiliation) to [info@intercax.com](mailto:info@intercax.com) to receive your license file.

## Obtaining Mac address via terminal

1. Launch a terminal. This can be done by searching from Spotlight.
2. Enter `ifconfig -a`
3. Find the 'ether' field for 'en0'  
e.g., d4:9a:20:f1:1f:f0 is the MAC address in the figure below

```
Terminal — bash — 80x24
